				Idi
Company	Company name the image associated with the main process (child) belongs to	ProcessId	Process ID used by the OS to identify the process that terminated	Tar
CommandLine	Arguments which were passed to the executable associated with the main process	Image	File path of the executable of the process that terminated	Gra
CurrentDirectory	The path without the name of the image associated with the process			Cal
User	Name of the account who created the process (child) . It usually contains domain name and user name	EventID 6 Kernel drive		
LogonGuid	Logon GUID of the user who created the new process. Value that can help you correlate this event	UtcTime	Time in UTC when event was created	_
Logoridala	with others that contain the same Logon GUID	ImageLoaded	File path of the driver loaded	Eve
LogonId	Login ID of the user who created the new process. Value that can help you correlate this event with	Hashes	Hashes captured by Sysmon driver	Uto
T . 16 . 11	others that contain the same Logon ID	Signed	Is the driver loaded signed	Pro
TerminalSessionId	ID of the session the user belongs to	Signature	Status of the giornature	Pro
IntegrityLevel	Integrity label assigned to a process	SignatureStatus	Status of the signature	Ima
Hashes Parent Process Cuid	Full hash of the file with the algorithms in the HashType field ProcessCLUD of the process that snawped (created the main process (child)	EventID 7 Image loade	ed Company of the Com	
ParentProcessGuid	ProcessGUID of the process that spawned/created the main process (child)	UtcTime	Time in UTC when event was created	Cre
ParentImage	Process ID of the process that spawned/created the main process (child)	ProcessGuid	Process Guid of the process that loaded the image	Eve
Parent/Command inc	File path that spawned/created the main process Arguments which were passed to the executable associated with the parent process.	ProcessId	Process ID used by the OS to identify the process that loaded the image	Uto
ParentCommandLine	Arguments which were passed to the executable associated with the parent process	Image	File path of the process that loaded the image	Eve
EventID 2 File creation	-	ImageLoaded	Path of the image loaded	Pro
UtcTime	Time in UTC when event was created	FileVersion	Version of the image loaded	Pro
ProcessGuid	Process Guid of the process that changed the file creation time	Description	Description of the image loaded	lma
ProcessId	Process ID used by the OS to identify the process changing the file creation time	Product	Product name the image loaded belongs to	Tar
lmage	File path of the process that changed the file creation time	Company	Company name the image loaded belongs to	
TargetFilename	Full path name of the file	OriginalFileName	OriginalFileName from the PE header, added on compilation	Eve
CreationUtcTime	New creation time of the file	Hashes	Full hash of the file with the algorithms in the HashType field	Uto
PreviousCreationUtcTim	Previous creation time of the file	Signed	State whether the image loaded is signed	Eve
EventID 3 Network cor	nection	Signature	The signer name	Pro
		Signature	The signer hame	
UtcTime	Time in UTC when event was created	SignatureStatus	status of the signature	
UtcTime ProcessGuid	Time in UTC when event was created Process Guid of the process that made the network connection		<u> </u>	Pro
			status of the signature	Pro
ProcessGuid	Process Guid of the process that made the network connection	SignatureStatus	status of the signature	Pro Ima Tar
ProcessGuid ProcessId	Process Guid of the process that made the network connection Process ID used by the OS to identify the process that made the network connection	SignatureStatus EventID 8 Remote three	status of the signature	Pro Ima Tar De
ProcessGuid ProcessId Image	Process Guid of the process that made the network connection Process ID used by the OS to identify the process that made the network connection File path of the process that made the network connection	SignatureStatus EventID 8 Remote thro UtcTime	status of the signature ead Time in UTC when event was created	Pro Ima Tar De
ProcessGuid ProcessId Image User	Process Guid of the process that made the network connection Process ID used by the OS to identify the process that made the network connection File path of the process that made the network connection Name of the account who made the network connection	SignatureStatus EventID 8 Remote thro UtcTime SourceProcessGuid	status of the signature ead Time in UTC when event was created Process Guid of the source process that created a thread in another process	Prolima Tar De
ProcessGuid ProcessId Image User Protocol	Process Guid of the process that made the network connection Process ID used by the OS to identify the process that made the network connection File path of the process that made the network connection Name of the account who made the network connection Protocol being used for the network connection	SignatureStatus EventID 8 Remote thro UtcTime SourceProcessGuid SourceProcessId	status of the signature ead Time in UTC when event was created Process Guid of the source process that created a thread in another process Process ID used by the OS to identify the source process that created a thread in another process	Prolima Tar De Eve

EventID 4 Sysmon service state changed

Time in UTC when event was created

Time in UTC when event was created

Process Guid of the process that terminated

Sysmon service state

Sysmon binary version

Sysmon config schema version

UtcTime

Version

UtcTime

ProcessGuid

SchemaVersion

EventID 5 Process terminated

State

EventID 1 Process Create

Time in UTC when event was created

Process Guid of the process that got spawned/created (child)

Version of the image associated with the main process (child)

OriginalFileName from the PE header, added on compilation

Process ID used by the OS to identify the created process (child)

Description of the image associated with the main process (child)

Product name the image associated with the main process (child) belongs to

File path of the process being spawned/created. Considered also the child or source process

UtcTime

ProcessGuid

ProcessId

FileVersion

Description

OriginalFileName

Product

Image

UtcTime	Time in UTC when event was created
SourceProcessGUID	Process Guid of the source process that opened another process. It is derived from a truncated part of the machine GUID, the process start-time and the process token ID.
SourceProcessId	Process ID used by the OS to identify the source process that opened another process. Derived partially from the EPROCESS kernel structure
SourceThreadId	ID of the specific thread inside of the source process that opened another process
Sourcelmage	File path of the source process that created a thread in another process
TargetProcessGUID	Process Guid of the target process
TargetProcessId	Process ID used by the OS to identify the target process
TargetImage	File path of the executable of the target process
GrantedAccess	The access flags (bitmask) associated with the process rights requested for the target process
CallTrace	Stack trace of where open process is called. Included is the DLL and the relative virtual address of the functions in the call stack right before the open process call
EventID 11 File create	
UtcTime	Time in LITC when event was created

EventID 10 Process Access

UtcTime Time in UTC when event was created ProcessGuid Process Guid of the process that created the file ProcessId Process ID used by the OS to identify the process that created the file (child) Image File path of the process that created the file TargetFilename Name of the file that was created CreationUtcTime File creation time

Eventio 12 Registry	y event (Object create and delete)
UtcTime	Time in UTC when event was created
EventType	CreateKey or DeleteKey
ProcessGuid	Process Guid of the process that created or deleted a registry key
ProcessId	Process ID used by the OS to identify the process that created or deleted a registry key
Image	File path of the process that created or deleted a registry key
TargetObject	Complete path of the registry key

Eventio 13 Registry ev	ent (value set)
UtcTime	Time in UTC when event was created
EventType	SetValue
ProcessGuid	Process Guid of the process that modified a registry value
ProcessId	Process ID used by the OS to identify the process that that modified a registry value
Image	File path of the process that that modified a registry value
TargetObject	Complete path of the modified registry key
Details	Details added to the registry key

EventID 14 Registry event (Key and value rename)	
UtcTime	Time in UTC when event was created
EventType	RenameKey
ProcessGuid	Process Guid of the process that renamed a registry value and key
ProcessId	Process ID used by the OS to identify the process that renamed a registry value and key
Image	File path of the process that renamed a registry value and key
TargetObject	Complete path of the renamed registry key
NewName	New name of the registry key

EventID 15 File creat	te stream hash
UtcTime	Time in UTC when event was created
ProcessGuid	Process Guid of the process that created the named file stream
ProcessId	Process ID used by the OS to identify the process that created the named file stream
Image	File path of the process that created the named file stream
TargetFilename	Name of the file
CreationUtcTime	File download time
Hash	Full hash of the file with the algorithms in the HashType field

EventID 16 Sysmon config state changed	
UtcTime	Time in UTC when event was created
Configuration	File path of the Sysmon config file being updated
ConfigurationFileHash	Hash (SHA1) of the Sysmon config file being updated

EventID 17 Pipe event (Pipe created)	

File path of the process that created the pipe

Image

EventID 18 Pipe event (Pipe connected)	
UtcTime	Time in UTC when event was created
EventType	ConnectPipe
ProcessGuid	Process Guid of the process that connected the pipe
ProcessId	Process ID used by the OS to identify the process that connected the pipe
PipeName	Name of the pipe connected
Image	File path of the process that connected the pipe

EventID 19 WMI event (WmiEventFilter activity detected)	
UtcTime	Time in UTC when event was created
EventType	WmiFilterEvent
Operation	wmievent filter operation
User	User that created the WMI filter
EventNamespace	Event namespace of the WMI class
Name	Event namespace of the WMI class
Query	WMI filter query
4	

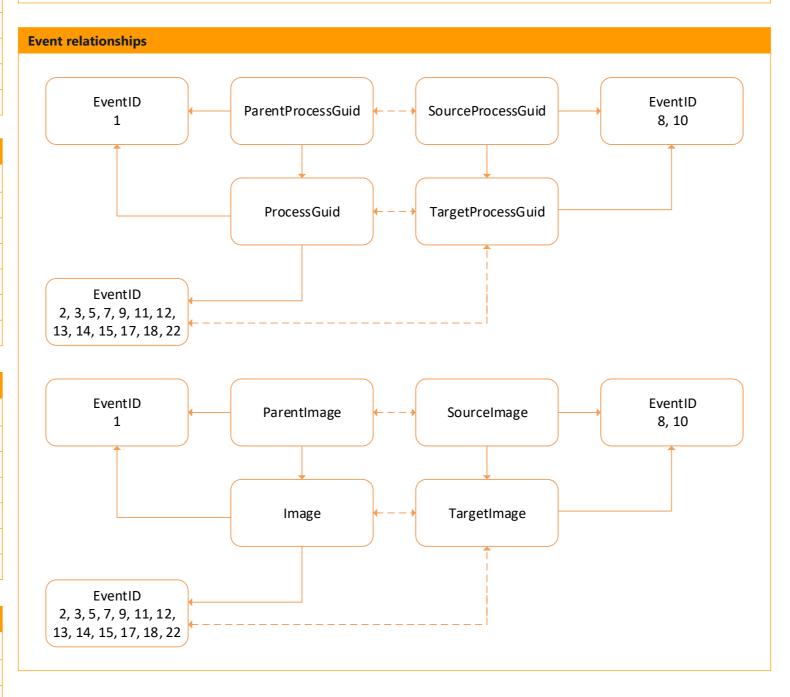

EventID 20 WMI event (WmiEventConsumer activity detected)	
UtcTime	Time in UTC when event was created
EventType	WmiConsumerEvent
Operation	wmievent consumer
User	user that created the wmi consumer
Name	name of the consumer created
Туре	Type of wmi consumer
Destination	command of consumer

EventID 21 WMI event (WmiEventConsumerToFilter activity detected)	
UtcTime	Time in UTC when event was created
EventType	WmiBindingEvent
Operation	wmievent consumer to filter
User	user that created the wmi filter
Consumer	Consumer created to bind
Filter	Filter created to bind

EventID 22 DNS	
UtcTime	Time in UTC when event was created
ProcessGuid	Process Guid of the process that made the DNS query
ProcessId	Process ID of the process that made the DNS query
QueryName	DNS name that was queries
QueryStatus	Query result status code
QueryResults	Query results
Image	File path of the process that made the DNS query

EventID 255 Sysmon Error	
UtcTime	Time in UTC when event was created
ID	Error code
Description	Error description

Universal for all events	
RuleName	Name of the configured rule
